## DEPARTMENT OF PUBLIC UTILITIES

### CORRECTED NOTICE OF FILING, PUBLIC HEARING, AND PROCEDURAL CONFERENCE

D.P.U. 15-120

March 9, 2016

Petition of Massachusetts Electric Company and Nantucket Electric Company d/b/a National Grid for approval by the Department of Public Utilities of its Grid Modernization Plan.

On August 19, 2015, Massachusetts Electric Company and Nantucket Electric Company d/b/a National Grid ("Company"), filed with the Department of Public Utilities ("Department") a petition for approval of its Grid Modernization Plan. The Company filed its Grid Modernization Plan pursuant to Grid Modernization, D.P.U. 12-76-B (2014); D.P.U. 12-76-C (2014). The Department has docketed this matter as D.P.U. 15-120.

In D.P.U. 12-76-B, the Department required each electric distribution company to submit a ten-year Grid Modernization Plan outlining how the company proposes to make measureable progress towards the following four objectives: (1) reducing the effects of outages; (2) optimizing demand, which includes reducing system and customer costs; (3) integrating distributed resources; and (4) improving workforce and asset management. The Department established three additional requirements to be included in the Grid Modernization Plan: (1) a marketing, education, and outreach plan with a component that is common to all companies, as well as a company-specific, component; (2) a research, development, and deployment plan; and (3) proposed infrastructure and performance metrics to measure progress in achieving grid modernization objectives, including common statewide and also company-specific metrics. The Grid Modernization Plan must also include a five-year short-term capital investment plan which includes a proposed approach to achieving advanced metering functionality within five years of the Department's approval of the Grid Modernization Plan.

The Company's Grid Modernization Plan presents four scenarios with varying degrees of advanced technology distribution investment and deployment of advanced metering functionality. The Company proposes estimated short-term investments of \$225.3 million to \$830.5 million depending on the scenario. Consistent with D.P.U. 12-76-C, the Company included in its Grid Modernization Plan a comprehensive business case analysis to illustrate how the Company's proposed short-term investments will achieve measurable progress towards the Department's four grid modernization objectives and an evaluation of the costs and benefits, both quantified and unquantified, of its Grid Modernization Plan.
