From the Director

If you need more evidence that the library is good for your health, a recent Washington Post article provides it. “Doing these 5 Things Could Cut Your Risk of Alzheimer’s by 60%,” cites research that people who did not smoke, limited themselves to one glass of wine a day and regularly engaged in mentally stimulating activities like reading the newspaper, visiting the library, or playing games earned the highest points for healthy lifestyles.

One of the quoted researchers said, “My biggest takeaway is I encourage older people to consume more leafy green vegetables, replace red meat with poultry and avoid as much as possible fried food. Also, walk to the grocery store and read books!”

Research out of the National Institute of Health reinforces these findings: “A nutritious diet, physical activity, social engagement, and mentally stimulating pursuits have all been associated with helping people stay healthy as they age. These factors might also help reduce the risk of cognitive decline and Alzheimer’s disease.”

The Library is a place where people socially engage and are mentally stimulated through access to reading, viewing and listening materials, programs and community events. Our expanded library space will provide more room for all these activities and much more. A central component of the design will be a variety of community spaces. We are currently working with the Library Building Committee and library staff on the design and will be holding public information sessions to gather public input.

As more of us address our aging process and strive to remain physically and mentally healthy the library will play an increasingly important role in our well-being.

*Fifty Things that Aren’t My Fault: Essays From the Grown-up Years*
By Cathy Guisewite

For all of us caught in that in-between space that is mom to teenagers and daughter to elderly parents—this book is a testament that it can be done—maybe not always with grace, but with humor. The creator of the “Cathy” comic strip (Cathy Guisewite), in her retirement, has written the book, *Fifty Things That Aren’t My Fault*. Every woman who has ever felt like a failure, inadequate, or overwhelmed should read this book. In a series of short essays she speaks for all women dealing with middle age and the responsibilities that come with it from those that are younger and those that are older. The big takeaway from this book is that “you are not alone” and Ms. Guisewite is the perfect companion!
